CAREER OBJECTIVE

Engineering graduate passionate about Artificial Intelligence and building data-driven solutions to real-world problems. Comfortable across the AI/ML workflow — from data cleaning and exploratory analysis (Python, Pandas, NumPy) to model building and evaluation (Scikit-learn, TensorFlow) and communicating results through visualization (Matplotlib, Seaborn). Strengthened my foundations through the Machine Learning and Deep Learning Specializations (DeepLearning.AI, Coursera) and applied them across independent projects. Seeking an AI / Machine Learning / Data Analyst role to contribute to meaningful, data-driven projects within a team.
