🐙 /AyushBhagwate

Summary

Electronics & Telecommunication Engineering graduate (2025) focused on Machine Learning and Deep Learning. I build end-to-end ML pipelines — from EDA and feature engineering to training, tuning and evaluation — with Python, Scikit-learn and TensorFlow. Completed the ML and DL Specializations by DeepLearning.AI.

Experience

Web Development Intern

Aug – Oct 2024

OctaNet Services Pvt. Ltd.

- ▶ Built responsive web interfaces with HTML, CSS & JavaScript on live project tasks.
- ▶ Collaborated in a delivery team; recognized for dedication and fast learning.

Head Event Coordinator

2024 – 2025

Electronics & Technocrats Associates (ETA) Club

- ▶ Led student volunteer teams and coordinated with faculty to deliver technical events.
- ▶ Owned planning & execution under deadlines — leadership, communication, decisions.

Projects

Titanic Survival Prediction · [Scikit-learn](#)

End-to-end classification with Logistic Regression — EDA, preprocessing, evaluation.

Wine Classification · [Random Forest](#)

Multi-class classification with ensemble learning and hyperparameter tuning.

Customer Segmentation · [K-Means](#)

Unsupervised clustering into behavioural customer segments.

Breast Cancer & Student Performance · [Decision Tree](#) · [Regression](#)

Binary classification and regression with feature selection & model persistence.

Skills

Languages

Python

SQL
